ARMED FORCES RECIPE SERVICE

The Armed Forces Recipe Service has been revised and updated and is issued for the purpose of standardizing and improving food prepared and served in military food service operations.

This recipe service is available for use by all Military Services and was coordinated and developed by technical representatives from each of the following:

Army Center of Excellence, Subsistence, Fort Lee, VA 23801-6020

Navy Supply Systems Command, Mechanicsburg, PA 17055-0791

Headquarters, Air Force Services Agency, San Antonio, TX 78216-4138

Headquarters, U. S. Marine Corps, Washington, DC 20380-1775

U. S. Army Soldier and Biological Chemical Command, Natick Soldier Center, Natick, MA 01760-5018

DEPARTMENTS OF THE ARMY, THE NAVY,
AND THE AIR FORCE

ARMED FORCES RECIPE SERVICE

This 2003 revision replaces the 1993 (original), 1997 (Change 1) and 1999 (Change 2) Armed Forces Recipe Service cards. This printing includes all new recipe development and revisions to the 1993, 1997 and 1999 sets of Armed Forces Recipe Service cards. This update contains a new recipe format which reflects the nutritional analysis per serving, located at the top of each recipe card.

New recipes have been incorporated. Some of the recipes are designated with a number 800 and above which represent recipes that include speed scratch items, convenience prepared foods and additional new recipes. Some recipes have been deleted while other recipes that were printed on cards as variations are now individual recipes. Sources of recipes include the U.S. Army Solider and Biological Command, commercial quantity food cookbooks and food product manufacturers.

Replace current recipe cards sets with this 2003 Update. Replace the Index of Recipes, NAVSUP Publication P-7, dated July 1999 with Index of Recipes, dated 2003. An index of recipes is issued to assist food service personnel to easily locate recipes by category to ensure a varied menu. This card should be retained and inserted in the front of the publication.

INFORMATION FOR STANDARDIZED RECIPES

Standardized recipes are a necessity for a well-run food service operation. All of the recipes have been developed, tested and standardized for product quality, consistency and yield. Recipes are the most effective management tool for guiding the requisitioning of supplies and controlling breakouts and inventory. The U. S. Dietary Guidelines were among the many considerations in both the selection and development of the recipes included in the file. Many of the recipes have been modified to reduce fat, salt and calories. For new and experienced cooks, consistent use of standardized recipes is essential for quality and economy. The **Armed Forces Recipe Service** contains over 1600 tested recipes yielding 100 portions printed on cards.

Yield - The quantity of cooked product a recipe produces. The yield for each recipe in the Armed Forces Recipe is generally given as 100 portions and in some recipes in count or volume, e.g., 2 pans, 8 loaves, 6-1/2 gallons. Portion size is key to determining the quantity of food to be prepared. Many recipes also specify the weight per portion. For example, 3/4 cup (6-1/2 ounces) Beef Stroganoff.

Ingredients Column – Ingredients are listed in the order used. The specific form or variety of each ingredient is indicated. For example:

Flour, wheat, general purpose
Flour, wheat, bread

Eggs, whole
Egg whites

Sugar, granulated
Sugar, brown

Measure, Weights, and Issue Columns – Measures and Weights indicate the Edible Portion (E.P.) quantity of the ingredient required to prepare the recipe for 100 portions. The issue column represents the As Purchased (A.P.) quantity required if this amount is different from the E.P. quantity.

Method Column - Describes how the ingredients are to be combined and cooked. For example, the method will describe the order in which to sift dry ingredients, to thicken a sauce, or to fold in beaten egg whites. The method contains directions for the most efficient order of work, eliminating unnecessary tools and equipment and unnecessary steps in preparation.

Issue**Method**

- 1 HARD COOKED EGGS: Place eggs in baskets as needed; cover with hot water. Bring to a boil; reduce heat; simmer 10 to 15 minutes. DO NOT BOIL. Remove from water; serve immediately. CCP: All fresh shell eggs must be heated to 155 F. or higher for 15 seconds.
- 2 SOFT COOKED EGGS: Cook individual portions. Place eggs in baskets; cover with hot water. Bring to a boil; reduce heat; simmer 4 minutes. DO NOT BOIL. Remove from water; serve immediately.

Notes

- 1 Remove eggs from refrigeration 30 minutes before using.
- 2 Eggs may be placed in perforated steamer pans and steamed to desired doneness.
- 3 If hard cooked eggs are to be used in salads or other dishes, plunge into cold running water immediately after cooking; add ice, if necessary, to cool eggs. CCP: Refrigerate at 41 F. or lower.
- 4 COLD WATER METHOD FOR COOKED EGGS: Place eggs in basket as needed; cover with cold water. Bring to a boil; reduce heat. For soft cooked eggs, simmer 1 minute. For hard cooked eggs, simmer 8 to 10 minutes. DO NOT BOIL.
- 5 STEAMER METHOD FOR COOKING EGGS: Grease steamer pan. Break eggs individually into a small container before dropping into greased pan. Egg depth should not exceed 2 inches. Place pan, uncovered, in steamer at 5 pound pressure for 6 to 8 minutes or 15 pound pressure for 5 to 7 minutes. Remove pan from steamer; cut eggs for easy removal. CCP: Fresh eggs must be heated to 155 F. or higher for 15 seconds. Consistency of cooked eggs can be controlled by adjusting cooking time.
